Construction Hydrant Meter Conditions of Service Agreement - Revised 07/26/22

For customers wanting to obtain a hydrant meter for commercial and residential construction purposes they must submit a Construction Hydrant Meter application for Town staff to review. An application fee of \$100.00 will be required.

Upon Receipt of the application the Town's Public Services Department will review the application and contact the customer within 2 business days. If approved, the applicant will sign the Conditions of Service Agreement and submit a \$1500.00 deposit for the hydrant meter. A monthly base fee of \$100.00 and \$3.00 per 1,000 gallons of water will apply. Customers will be billed once a month for the water consumption and base fee.

The Public Services Dept. will install the hydrant meter at an approved location. A \$50.00 hydrant meter installation fee will apply. At any time the meter is requested to be relocated from the approved location a \$50.00 relocation fee will apply. Requests for relocation must be made 2 business days prior to the requested date. Only Town of Wickenburg employees are allowed to set, remove, relocate and repair town-owned hydrant meters.

The customer **must** supply a reduced pressure principle backflow assembly (RPPA) or an approved double check valve assembly. Prior to the Town installing the hydrant meter the applicant must submit proof that it has been tested in the last 30 days.

Construction Meters are for temporary use only with a maximum rental term of 12 months from the date of installation. Note: Water delivery may be discontinued at any time without advance notice.

For any meter stolen, lost or rendered irreparable the customer will be responsible and forfeit their deposit. If any damages occur to the meter, the customer will be billed accordingly. If payment is not made, a portion of their deposit will be withheld to cover actual expenses to repair the meter and the agreement will be terminated.

The customer must make every reasonable attempt to ensure the meter is functioning correctly. Knowingly using a faulty meter or tampering with the register constitutes water theft which may be subject to criminal charges.

Hydrant/Spanner wrenches are to be used to operate any fire hydrant. Any damage and repair costs to the hydrant operating nut due to the use of a pipe wrench will be billed to the applicant.

The hydrant operating nut should only be turned twice per work shift, once at the beginning and once at the end. No hydrant shall be left under pressure when the hydrant meter is not in use.

The hydrant main valve should be in the fully opened position or fully closed position. Controlling the amount of water flow from the hydrant is to be done with the valve provided with the hydrant meter assembly.

The customer will be responsible for any negligent damage to the fire hydrant when in use. The customer and Public Services employee will review the condition of the hydrant being utilized before and after use.

Customers will provide a chain and lock to secure the meter assembly and backflow assembly to the fire hydrant.

Any water withdrawn from a fire hydrant will not be used for potable drinking water or recreational uses including swimming pools. The water is also not to be used outside Town limits and cannot be resold.

The signature on this application certifies agreement to comply with all items in the Conditions of Service Agreement.

Arizona Revised Statute § 9-495 requires in any written communication between a city or town and a person to provide the name, telephone number, and email address of the employee who is authorized and able to provide information about the communication if the communication does any of the following:

1. Demands payment of a tax, fee, penalty, fine or assessment;
2. Denies an application for a permit or license that is issued by the city or town; or
3. Requests corrections, revisions or additional information or materials needed for approval of any application for a permit, license or other authorization that is issued by the city or town.

An employee who is authorized and able to provide information about any communication that is described above shall reply within five (5) business days after the city or town receives that communication.

For Questions regarding Hydrant Meters please contact:

CONSTRUCTION HYDRANT METER DETAIL

GENERAL NOTES

1. Backflow assembly must be tested by a certified backflow assembly tester 30 days prior to the meter being set. Proof must be shown.
2. User must remove backflow assembly when hydrant meter is removed or relocated.
3. User is liable for any damage to the hydrant and all attachments to the hydrant.
4. User must use gate valve to control flow of water, not the hydrant valve assembly.
5. A Double-Check Valve Backflow Assembly may be used if approved by the Town
